Research Interests

My interests lie in explainable AI (XAI) and its applications. My research focuses on the understanding of deep learning, with the aim of advancing neural networks in mission-critical applications. Currently, my work has been shown to successfully improve the performance of deep learning in the areas of surface defect detection and bearing fault detection.

Education

Harbin Institute of Technology — Heilongjiang, China
PH.D. in Instrumentation Science and Technology — *Expected Jul 2023*

Harbin Institute of Technology — Heilongjiang, China
M.S. in Instrumentation Science and Technology — *Jul 2017 - Sept 2019*

Harbin Institute of Technology — Heilongjiang, China
B.S. in Instrumentation Science and Technology — *Jul 2013 - Sept 2017*

"SAL-CNN: Estimate the Remaining Useful Life of Bearings Using Time-frequency Information". arXiv preprint arXiv:2204.05045, 2022. [arxiv]

Projects

- **Theory and methods for mathematical interpretation of multi-layer intelligent recognition networks**: This project aims to provide an explanation of the deep neural networks used in the special applications towards improving the reliability of the model.

Awards and Honors

Graduate Scholarship — 2017,2018

Computer Skills

- Deep Learning, Machine Learning, Image Processing
- Python, Matlab
- PyTorch, TensorFlow

Invited Talk

- Jing-Xiao Liao, **Hang-Cheng Dong**, Zhi-Qi Sun, Jinwei Sun, Shiping Zhang, Feng-Lei Fan. "Attention-embedded Quadratic Network (Qttention) for Effective and Interpretable Bearing Fault Diagnosis". At the 2nd International Highlevel Forum on High-end Measurement Instruments & 12th International Symposium on Precision Engineering Measurements and Instrumentation, Guilin, China, 8-10 August, 2022.

Academic Service
